Metrics Overview

1 Average Interactions per Post

The sum of interactions (Reactions, Comments, and Shares) divided by the number of posts published on the same page during a specific time range.

2 Evolution of Interactions

The daily sum of interactions from monitored social media profiles.

3 Distribution of Interactions

The distribution of interactions (reactions, comments, shares) during a selected time range.

4 Most Engaging Post Types

This shows the distribution of the Post Types by the average Interactions per 1000 fans metric or by the average Interactions per post metric during the selected time range.

5 User Activity

This graph shows the total number of all user posts (user posts, questions and comments) by day of the week and by hour of the day during a selected time range.

6 Number of Interactions per 1000 Fans

Every post has the metric Number of interactions per 1000 fans that identifies how engaging the post is. It is the sum of interactions (reactions, comments, and shares) divided by the number of fans a page has on the day of the post and multiplied by 1000. The daily, weekly and monthly values for this metric are then calculated as the sum of this metric for all posts made on a particular day, during a particular week or month.

7 Number of Page Posts

The sum of all posts posted by each Page.

8 Distribution of Page Post Types

This shows the breakdown of the posts according to the post type during a selected time range.

9 Number of Fan Posts

The number of fan posts a page received during a selected time range.

10 Growth of Total Fans

This graph shows the increase or decrease in fans during a selected time range.

11 Share of Posts

The share of posts in the selected time range, where the type (Promoted, Organic, Undetected) depends on whether the post has been marked as Promoted by the Promoted Post Detection algorithm or by insights paid metrics. Note that data for profile labels is always based on the Promoted Post Detection algorithm.

12 Share of Interactions

The share of interactions across posts in the selected time range, where the type (Promoted, Organic, Undetected) depends on whether the post has been marked as Promoted by the Promoted Post Detection algorithm or by insights paid metrics. Note that data for profile labels is always based on the Promoted Post Detection algorithm.

13 Response Rate to User Questions

This graph shows the percentage and the number of user questions the monitored page answered to versus the percentage and the number of user questions that did not receive a response during the selected time range. A user question is a user post on the company's page that contains a question mark in one of several possible languages (English, Armenian, Arabic, Japanese, and others). User questions that were either marked as spam, hidden, or deleted by the admin are not included.

14 Number of User Questions

The total number of received questions during a selected time range.

15 Avg Response Time

The average time it took the monitored page to respond to a user post (or question) during a selected time range.

16 Response Time Segments for User Questions

This graph shows a breakdown of the time it took the monitored page to respond to user questions during a selected time range. The following time intervals are used: under 10 minutes, 10-30 minutes, 30-60 minutes, 60-90 minutes, 90 minutes - 2 hours, 2-4 hours, 4-6 hours, 6-12 hours, 12-24 hours, 24-48 hours, 48-72 hours, or more than 72 hours. A user question is a user post on the company's page or a user post mentioning the company's page that contains a question mark in one of several possible languages (English, Armenian, Arabic, Japanese, and others). User questions that were either marked as spam, hidden, or deleted by the admin are not included.
